---

Hi Eric,

I have to leave today at 2pm, so I'm sending you a lot of information and I will give you a brief summary below. If you need additional info or interpretation, etc., please let me know.

There are EJSCREEN printouts (and csv files) for the coordinates below for block group, 0.5 mi, 1 mi, and 3 mi. The EJ Index itself (which is a combo of the env factor and the demographic info) does not rise to the interim threshold of 80<sup>th</sup> percentile. If you go to EJSCREEN you'll see it is grayscale until the 80<sup>th</sup> percentile. You can also look at the tech document, etc. there.

Here is the summary info:

EJSCREEN environmental factor is in the highest percentile (95-100<sup>th</sup>) for Proximity to RMP facility for the block group as a whole

EJSCREEN demographic factors % over 65 is in the highest percentile (95-100<sup>th</sup>) and % less than High School education is in the 80-90<sup>th</sup> percentile for the block group

EJSCREEN EJ indices do not show over 80<sup>th</sup> percentile

EJSCREEN Proximity to RMP environmental factor scores in the highest percentile nationwide for the coordinate with a 0.5 mile buffer. At the 1 mi and 3 mi buffers the percentage is still in the 80's as is the Population over 64

Blockgroup 483090042012

Population in the Block group = 1169

% Minority=6% (19<sup>th</sup> percentile)

% Low Income=25% (43<sup>rd</sup> percentile)

% Linguistically Isolated=2% (53<sup>rd</sup> percentile)

% Less than High School education=25% (81<sup>st</sup> percentile)

% Under 5 years old=6% (45<sup>th</sup> percentile)

% Over 64=34% (97<sup>th</sup> percentile)

Primary Demographic Index=15% (24<sup>th</sup> percentile)

I have attached the EJView summary sheets (ACS and Census 2010) as well as the EJView

screening report for what I think is the appropriate facility name—you might need to verify that. This EJView sheet is a quick way to look at the info—again shows the same basic info as my summary, but may assist you.
